# Addendum to the cobas® 8000 data manager Operator's Manual

Manual Version	Software Version	Revision Date	Changes
6	1.05	December 2015	UltraVNC licence agreement

Table 1      Revision History

In order to ensure that readers of the **cobas® 8000 data manager Operator's Manual** use the most up-to-date content, Roche recommends to manually mark the affected passage(s) in the original manual.

To update the **cobas® 8000 data manager Operator's Manual**:

1. Familiarize yourself with the items that have been revised.
2. Identify the page number affected in the original document.
3. Go to the appropriate page in the original document and manually mark the revisions. For example, cross out text that is no longer applicable or add a reference where to find new and revised content.

If you print these pages, Roche recommends printing them single-sided. In this way, you can easily insert them in the existing document.

## Structure of a changed entry

The following illustration explains how the addendum is presented in this document.

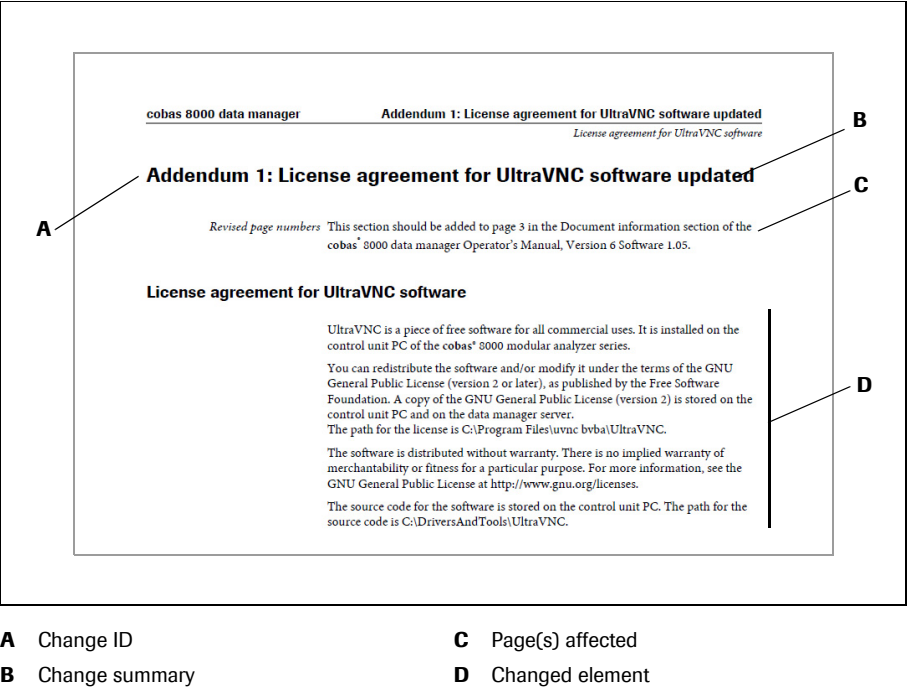

Figure 1      Structure of a changed entry

## Addendum 1: License agreement for UltraVNC software

*Revised page numbers* This section should be added to page 3 in the Document information section of the cobas® 8000 data manager Operator's Manual, Version 6 Software 1.05.

### License agreement for UltraVNC software

UltraVNC is a piece of free software for all commercial uses. It is installed on the control unit PC of the cobas® 8000 modular analyzer series.

You can redistribute the software and/or modify it under the terms of the GNU General Public License (version 2 or later), as published by the Free Software Foundation. A copy of the GNU General Public License (version 2) is stored on the control unit PC and on the data manager server.

The path for the license is C:\Program Files\uvnc bvba\UltraVNC.

The software is distributed without warranty. There is no implied warranty of merchantability or fitness for a particular purpose. For more information, see the GNU General Public License at <http://www.gnu.org/licenses>.

The source code for the software is stored on the control unit PC. The path for the source code is C:\DriversAndTools\UltraVNC.
